About the Micro, Small and Medium Enterprises (MSMEs) Financing Forum 2023

The permanent forum for dialogue of banks with clients from the sector of Micro, Small and Medium-sized Enterprises. The main host from the banking environment is the Polish Bank Association Council for Micro, Small and Medium-sized Enterprises which associates almost all the banks in Poland that provide financing for this type of entrepreneurs.

This year's Forum is a special edition, just as the period is special - it is not only the time of the Eastern conflict, destabilization caused by high inflation and galloping energy prices, but also the launch of new EU funds, which have been regularly stimulating and supporting the dynamics of development in Poland from 2004 - also in the SME sector and new revolutionary economic regulations, including those regarding creditor-debtor relations as well as sustainable development.

The purpose of this year's edition of the Forum is to jointly analyze and present information on the entrepreneurs' access to credit and to other financial services, including the discussion on the new regulatory factors and the planned instruments of public support for the external financing for the business. During the Forum we will also present the newest reports on the credit market status and we will also offer the possibility of individual consultations with the experts from financial institutions and public institutions.

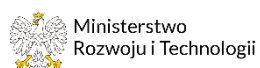

The meeting will be the opportunity to find out about the financial offer and the newest support programmes as well as to hold discussions and share experiences on the SME financing development. We invited banks, institutions from the banking environment, organizations of entrepreneurs and key public institutions for the financial market from the SME area.

We deeply hope that the conference will be an event gathering many participants of the market, including innovators, entrepreneurs, representatives of the business environment and representatives of business-oriented mass media. The first guests - presidents of banks, presidents of organizations of entrepreneurs, research centres, heads of ministries and government agencies which are crucial for business matters have already confirmed their participation and speeches.
